

# **BITRON™ PRODUCTS**

The Bi-Tron formula fuses to metal surfaces, providing constant lubrication under even the most severe conditions. Bi-Tron Lubricants and conditioners contain no solids to clog engine parts or reduce power and will not void warranties. By reducing friction, engines run cooler, more smoothly and more efficiently. Performance and mileage can be consistently improved and emissions reduced.

## **Engine Formulation**

- Engineered for all internal combustion engines
- Compatible with all mineral, vegetable & synthetic oils
- Conforms no solids, PTFE or metal

- BENEFITS:**
- Quieter, smoother running engine
  - Easier cold weather starting
  - Improved engine response
  - Greater fuel efficiency due to reduced friction

## **EP Metal Treatment**

- Compatible with all mineral & synthetic oils & hydraulic fluids

- BENEFITS:**
- Smoother, faster shifting
  - Reduces noise and vibration
  - Reduces friction, wear & operating temperature
  - Maximises drive-train power and efficiency
  - Protects steering box, transmission & differential
  - Ideal in hydraulic applications

## **Penetrating Lubricant**

- Unlimited applications
- Lubricates while it penetrates
- Displaces moisture

- BENEFITS:**
- Protects against & breaks down rust & corrosion
  - Reduces friction, wear & operating temperatures
